Regional Transportation Plan Update

Principles for System Development

	Preferred	Auto-oriented Strategic	Transit-oriented Strategic
VISION <i>What do we want?</i>	1. Implements all Primary Growth Concept Components 2. Preserves UGMFP "Regional Highway" Function 3. Addresses most Secondary Growth Concept Components 4. Addresses many needs for other Growth Concept Components 5. Meets all 20 year benchmarks for Growth Concept implementation	1. Implements the most significant Primary Growth Concept Components 2. Substantially preserves Regional Highway Function 3. Addresses many Secondary Growth Concept Components 4. Addresses some needs for other Growth Concept Components 5. Meets some 20 year benchmarks for Growth Concept implementation	1. Implements the most significant Primary Growth Concept Components 2. Selectively preserves Regional Highway Function 3. Addresses many Secondary Growth Concept Components 4. Addresses some needs for other Growth Concept Components 5. Meets some 20 year benchmarks for Growth Concept implementation
Modal Mix	All modal needs are met	60% of Preferred road needs are met 40% of Preferred non-road needs are met	40% of Preferred road needs are met 60% of Preferred non-road needs are met
ELEMENTS <i>How do we build it?</i>	<input type="checkbox"/> Central City and Regional Centers served by light rail, direct access to regional highway system, arterial capacity improvements and major pedestrian and bicycle system improvements. <input type="checkbox"/> Industrial Areas have strong connections to regional highway system and intermodal facilities. <input type="checkbox"/> Town Centers, Corridors and Main Streets are served by primary transit, improved arterial streets and significant improvements to the pedestrian and bicycle system. <input type="checkbox"/> Neighborhoods and Employment Areas are served by secondary transit, improved arterial streets and have some improvements to the pedestrian and bicycle system.	<input type="checkbox"/> Central City and most Regional Centers served by light rail, direct access to regional highway system, arterial capacity improvements and major pedestrian and bicycle system improvements. <input type="checkbox"/> Most Industrial Areas have strong connections to regional highway system and intermodal facilities. <input type="checkbox"/> Many Town Centers, Corridors and Main Streets are served by primary transit, improved arterial streets and significant improvements to the pedestrian and bicycle system. <input type="checkbox"/> Many Neighborhoods and Employment Areas are served by secondary transit, improved arterial streets and have some improvements to the pedestrian and bicycle system.	<input type="checkbox"/> Central City and most Regional Centers served by light rail, commuter rail, direct access to regional highway system, arterial capacity improvements and major pedestrian and bicycle system improvements. <input type="checkbox"/> Most Industrial Areas have strong connections to regional highway system and intermodal facilities. <input type="checkbox"/> Many Town Centers, Corridors and Main Streets are served by primary transit, improved arterial streets and significant improvements to the pedestrian and bicycle system. <input type="checkbox"/> Many Neighborhoods and Employment Areas are served by secondary transit, improved arterial streets and have some improvements to the pedestrian and bicycle system.
FINANCE <i>What can we afford?</i>	<input type="checkbox"/> Includes all currently identified revenue <input type="checkbox"/> Identifies specific new federal, state and regional revenue sources <input type="checkbox"/> Assumes unspecified new revenue sources <input type="checkbox"/> Assumes some new local revenue sources	<input type="checkbox"/> Includes all currently identified revenue <input type="checkbox"/> Identifies specific new federal, state and regional revenue sources <input type="checkbox"/> Assumes some new local revenue sources	<input type="checkbox"/> Includes all currently identified revenue <input type="checkbox"/> Identifies specific new federal, state and regional revenue sources <input type="checkbox"/> Assumes some new local revenue sources
PERFORMANCE <i>How does it work?</i>	<input type="checkbox"/> Meets all Chapter 1 modal targets <input type="checkbox"/> Meets all RTP performance measures <input type="checkbox"/> Meets State TPR requirements	<input type="checkbox"/> Meets many Chapter 1 modal targets <input type="checkbox"/> Meets auto and Freight RTP performance measures <input type="checkbox"/> Meets Intent of State TPR requirements <input type="checkbox"/> Serves as policy determination of "adequate" transportation system	<input type="checkbox"/> Meets many Chapter 1 modal targets <input type="checkbox"/> Meets transit, bike and ped RTP performance measures <input type="checkbox"/> Meets Intent of State TPR requirements <input type="checkbox"/> Serves as policy determination of "adequate" transportation system

RTP System Development

Modeling Assumptions

RTP System Development Round 1 Modeling Highlights

Key Motor Vehicle Projects

RTP Project #	Project Name and Location	Project Description	Auto Strategic	Non-Auto Strategic	Preferred
1	Highway 217 Improvements (I-5 to US 26)	a. Widen to six lanes b. Widen to six lanes with an internal express lane	✓	✓	✓
2	Freeway ATMS (All Regional Freeways)	Install ramp meters, communication system and incident management on area freeways	✓ 60%	✓ 80%	✓ 100%
3	I-5/217 Interchange Phase 2	Complete interchange reconstruction	✓	✓	✓
4-6	Sunrise Highway	a. Construct new facility from I-205 to Rock Creek b. Acquire right-of-way from Rock Creek to 222nd Avenue c. Construct new facility from 222nd Avenue to US 26	✓ ✓ ✓	✓ ✓ ✓	✓ ✓ ✓
7	Highway 212 (Rock Creek to Damascus)	Construct climbing lanes; interim improvements through Damascus	✓	✓	✓
8-12	Mount Hood Parkway	a. Interim capacity improvements and access controls along 242nd/Hogan from Glisan to Palmquist b. Construct new I-84 interchange connection c. Preserve future right-of-way from Palmquist to US 26 d. Construct new facility from Palmquist to US 26 e. Move freight from existing 181st/Burnside route	✓ ✓ ✓ ✓ ✓	✓ ✓ ✓	✓ ✓ ✓ ✓ ✓
13-14	Tualatin-Sherwood Highway	a. Construct two-lane tollway with no additional interchanges b. Construct four-lane tollway with access control on 99W in Sherwood area	✓	✓	✓

RTP Project #	Project Name and Location	Project Description	Auto Strategic	Non-Auto Strategic	Preferred
16	I-5 Interstate Bridge	a. Improve bridge approaches; retain current bridge b. Construct new Columbia River bridge to provide 6 lanes plus HOV lanes c. Construct new Columbia River bridge to provide eight lanes	✓	✓	✓
17	I-5/Broadway Interchange Improvements (Greeley Street to I-84)	Modernize freeway and ramps	✓		✓
18	I-5 North Improvements (Lombard Street to Columbia Boulevard)	Widen to six lanes with interchange improvements	✓	✓	✓
19	Water Avenue ramps on I-5	Construct new freeway access	✓	✓	✓
20	I-5 South Improvements (south of I-405)	Safety and modernization improvements			✓
21&67	South Portland Access Study/South Willamette Crossing Study	Redesign Ross Island bridge and Central City approaches			✓
22	Sunset tunnels on US 26	Safety and modernization improvements	✓		✓
23-27	Sunset Highway Improvements	a. Sylvan to Camelot, Phase 3 b. Widen to six lanes from Sylvan to Highway 217 c. Widen to six lanes from Highway 217 to 185 th Avenue	✓ ✓ ✓	✓ ✓	✓ ✓ ✓
28	Cornelius Pass Road (US 26 to US 30)	Improve to better accommodate freight movement	✓	✓	✓
29	Highway 217 Improvements (NB - TV Hwy to US 26)	Widen to six lanes; ramp improvements	✓	✓	✓
31	I-205 Bridge Improvements (in Oregon City)	Widen bridge to add additional lanes			✓
32	I-205 Freight Improvements (in Clackamas County)	Truck climbing lanes west of Willamette River	✓		✓
33	I-205/Sunnyside Road	Add auxiliary lanes on I-205	✓	✓	✓
34	Highway 224 Improvements (McLoughlin to I-205)	Access management and capacity improvements			✓
37-36	Highway 213 Intersection Improvements (Washington and Abernethy at Hwy 213)	a. Intersection improvements b. Grade separate existing intersections	✓ ✓	✓ ✓	✓ ✓

RTP System Development
Round 1 Modeling Highlights

Key Motor Vehicle Projects (continued)

RTP Project #	Project Name and Location	Project Description	Auto Strategic	Non-Auto Strategic	Preferred
41	Highway 213 Improvements (Abernathy Road to Beavercreek)	Access management and capacity improvements	✓		✓
38	Highway 213 Intersection Improvements (Beavercreek/Hwy 213)	a. Intersection improvements		✓	
		b. Grade separate existing intersection	✓		✓
40	Highway 213 Improvements (Clackamas CC to Leland Road)	Access management and capacity improvements			✓

RTP System Development Round 1 Modeling Highlights

Key Public Transportation Projects

RTP Project #	Project Name and Location	Project Description	Existing Resources 1.5%	Auto Strategic 2.5%	Non-Auto Strategic 3.8%	Preferred 4.5%
61	Hillsboro-Gresham LRT	Westside LRT/Eastside LRT	✓	✓	✓	✓
45	South/North Light Rail (Clackamas TC to Clark County VA Hospital)	New LRT service	✓	✓	✓	✓
46	South/North Light Rail (Oregon City extension)	New LRT service		✓	✓	✓
47	Airport Light Rail (Gateway to Portland International Airport)	New LRT service	✓	✓	✓	✓
48	Highway 217 Corridor (Washington County)	a. Commuter Rail - Peak hour service only (Wilsonville to Beaverton) b. Commuter Rail - Peak and Mid-day service (Wilsonville to Beaverton) c. Highway 217 LRT and Commuter Rail (Highway 217 LRT from Beaverton to Tigard and commuter rail from Tigard to Wilsonville)		✓	✓	✓
54	Portland CBD to Tigard TC (via Barbur Boulevard)	New Rapid Bus on Barbur Boulevard (HCT Corridor)			✓	✓

Note: Percentage indicates rate of growth in Tri-Met service hours per year.

RTP System Development Round 1 Modeling Highlights

Key Public Transportation Projects (continued)

RTP Project #	Project Name and Location	Project Description	Existing Resources 1.5%	Auto Strategic 2.5%	Non-Auto Strategic 3.8%	Preferred 4.5%
606	Portland to Lake Oswego	a. Frequent bus corridor b. Frequent bus and peak rail service c. Frequent bus and peak/off-peak rail service		✓	✓	✓
a. - c. under regional projects	Tri-Met Operations	Service to include the primary transit network, regional connections, connections to MAX, local bus access improvements and better service on existing routes (such as more frequent service and extended hours of operation, including evenings and weekends)	✓	✓	✓	✓
e. - h. under regional projects	Tri-Met Capital Projects	Capital projects to include vehicle purchases, customer information, operational purchases and corridor improvements	✓	✓	✓	✓
i. under regional projects	C-TRAN Operations	New and existing routes	✓	✓	✓	✓
a. under Wilsonville projects	SMART Operations	New and existing routes	✓	✓	✓	✓

Note: Percentage indicates rate of growth in Tri-Met service hours per year.

• METRO

RTP System Development

Round 1 Modeling Highlights

Key Arterial Projects

- Improve Tualatin-Sherwood Road from 99W to Teton Avenue
- Redesign the intersection of Beaverton-Hillsdale Highway/Scholls Ferry Road/Oleson Road to improve safety in the Raleigh Hills town center
- Improve the safety and capacity of the intersection of Highway 43 and Willamette Falls Drive in West Linn town center
- Extend Beef Bend Road from Scholls Ferry Road to 99W in Sherwood town center
- Realign intersection and add a traffic signal and left turn lanes at the Stafford Road/Borland Road intersection in the Stafford urban reserve area
- Widen 122nd/129th Avenue from Sunnyside Road to King Road and smooth curves in the Happy Valley town center
- Extend Jennifer Street/135th Avenue from 130th Avenue to Highway 212 to improve access to Clackamas industrial area
- Extend Boeckman Road to Grahams Ferry Road to improve east-west connectivity in Wilsonville town center
- Widen Baseline Road in Hillsboro regional center, including sidewalks and bike lanes
- Widen Barnes Road and improve intersections in Sunset town center
- Signalize the intersection of 33rd Avenue and Marine Drive to improve freight movement in the PDX industrial area
- Widen Marine Drive at Rivergate West and T-6 intersection to improve access to industrial areas and marine terminals
- Widen Airport Way to six lanes from I-205 to PDX terminal
- Reconstruct 242nd Avenue between Powell Boulevard and Burnside Road in Gresham regional center

RTP System Development Round 1 Modeling Highlights

Key Connectivity Projects

- US 26 overpasses at Cedar Mill (Science Park to Meadows Drive), 173rd/174th Avenue and 235th Avenue from Evergreen Parkway to Jacobson Road to better connect areas north and south of US 26 for all modes
- US 26 underpass at Sunset transit center from Barnes Road to Butner Road west of Highway 217 to improve north/south circulation for all modes
- Reconstruction of five railroad bridges in East Multnomah County to allow for road widening and to improve safety and north-south auto and freight circulation
- I-205 overpass at Causey Avenue to new east I-205 frontage road in Clackamas regional center
- West Monterey Avenue extension from 82nd Avenue to Fuller Road in Clackamas regional center
- I-5 overpasses in Wilsonville and West Portland Town Center to improve east/west circulation for all modes
- Completion of central Beaverton street connections such as Henry Street from Millikan Way to Center Street and new connections between Henry and 114th, Hall Boulevard and Cedar Hill Boulevard and Griffith to 114th Avenue
- Highway 217 overpasses at Cascade Plaza to Washington Square and at Elmhurst Street from Hunziker Street to 72nd Avenue

RTP System Development

Round 1 Modeling Highlights

Key Boulevard Design Projects

- Grand Avenue/MLK Boulevard in central city
- McLoughlin Boulevard from Highway 224 to River Road in Milwaukie regional center
- Division Street from Wallula Street to Hogan Road in Gresham regional center
- 7th Street from McLoughlin Boulevard to Division Street in Oregon City regional center
- McLoughlin Boulevard relocation off the Willamette River in Oregon City regional center
- Stark Street/Washington Street from 92nd Avenue to 108th Avenue in Gateway regional center
- Hall Boulevard/Watson Boulevard from Allen Boulevard to Cedar Hills Boulevard in Beaverton regional center
- Tualatin Valley Highway from Shute Park to Baseline/Oak Street to 10th Street in Hillsboro regional center
- 82nd Avenue from Monterey Avenue to Sunnyside Road in Clackamas regional center
- Hall Boulevard from Scholls Ferry Road to Locust Street in Washington Square regional center

RTP System Development

Round 1 Modeling Highlights

Key Pedestrian Projects

Pedestrian district and access to transit improvements in the central city, regional centers, town centers and along major transit corridors throughout the region that include improved sidewalks, landscaped buffer, street lighting, marked street crossings, bus shelters and benches

Examples include:

- Reconfigure signal phasing to add pedestrian crosswalk at the intersection of SE Powell Boulevard and Milwaukie Avenue in the central city
- Beaverton-Hillsdale Highway from Capitol Highway to 65th Avenue in Hillsdale town center
- Barbur Boulevard from downtown Portland to Tigard town center
- Capitol Highway from Multnomah Boulevard to Taylors Ferry Road in West Portland town center
- Highway 43 in Lake Oswego town center
- Hocken Avenue/Tualatin Valley Highway to 110th Avenue/Cabot Street in downtown Beaverton
- Tualatin Valley Highway, Baseline Road, Oak Street, 1st Avenue and 10th Avenue in Hillsboro regional center
- Halsey Street, Weidler Street, Glisan Street, Washington/Stark Street, 99th Avenue and 102 Avenue in Gateway regional center
- Burnside Road, Powell Boulevard, Civic Way, Eastman Parkway, Main Street and Cleveland Street in Gresham regional center
- Halsey and Glisan Streets in Fairview/Wood Village town center)
- Johnson Creek Boulevard from 36th Avenue to 45th Avenue
- Improved access to the Willamette River from Milwaukie and Oregon City regional centers
- 82nd Avenue, Sunnyside Road, Sunnybrook Road and Monterey Street in Clackamas regional center

RTP System Development

Round 1 Modeling Highlights

Key Bicycle Projects

- Bicycle safety, education and encouragement pilot project
- Study feasibility of a Willamette River greenway corridor from the Sellwood Bridge to West Linn town center
- NE/SE 40th Avenue bicycle boulevard from NE Holman Street to SE Tolman Street in Hollywood town center
- Oleson Road bike lanes from Beaverton-Hillsdale Highway to Garden Home in Raleigh Hills town center
- Division Street bike lanes from 182nd Avenue to Kane Road in Gresham regional center
- Highway 99E bike lanes from Harrison Street in Milwaukie regional center to the Clackamas River in Oregon City regional center
- Canyon Road/Tualatin Valley Highway bike lanes from 91st Avenue to 142nd Avenue in Beaverton regional center
- Tualatin Valley Highway (Oak Street) bike lanes from 10th Avenue to Dennis Avenue in Hillsboro regional center

RTP System Development

Round 1 Modeling Highlights

Key Future Planning Projects

Corridor Studies and Refinement Plans

- I-5 Trade Corridor Study from I-405 in Oregon to I-205 in Washington
- I-205 Corridor study from I-5 to I-84
- Highway 213 Green Corridor study south of Leland Road
- Willamette River Greenway Corridor Study from the Sellwood Bridge to West Linn town center
- St. John's study to improve connection between St. John's Bridge and North/Northwest Portland industrial areas to mitigate truck traffic intrusion in St. John's residential and business neighborhoods
- Highway 224 access management plan in the Milwaukie regional center
- Damascus/Pleasant Valley future street plan
- Rosemont Corridor Plan from West Linn to Stafford Road to study the potential for Rosemont Road to be an alternative north/south route to Highway 43
- 99W Circulation Study from Tualatin-Sherwood Expressway through Sherwood town center to study the potential of frontage roads on both sides of 99W to manage access

Area Plans that Implement 2040

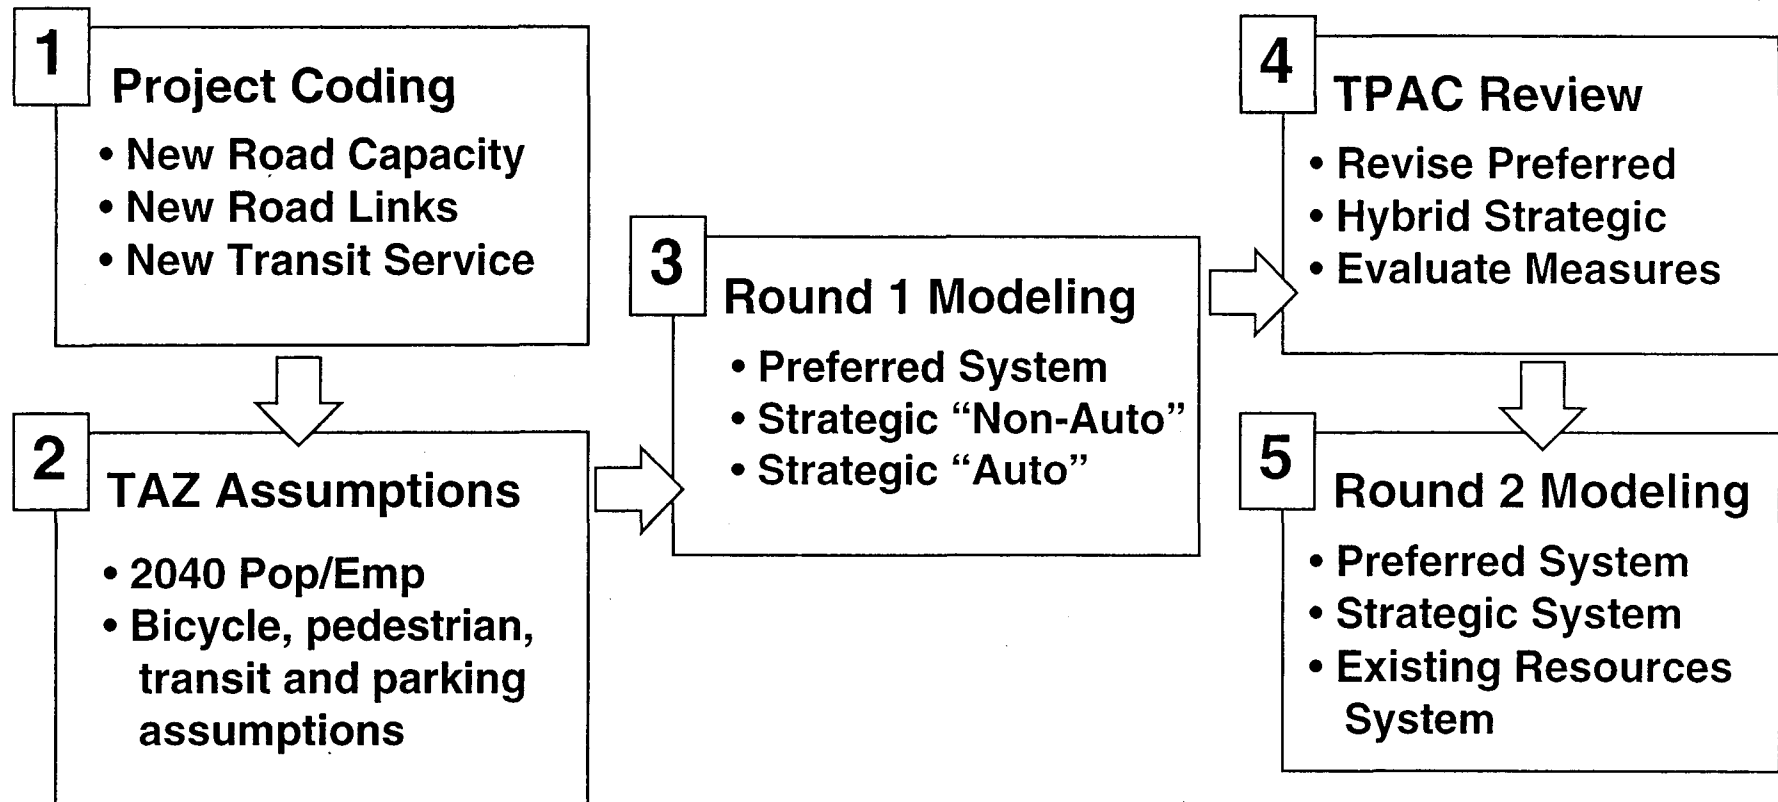

- Lents town center plan
- Gateway regional center plan
- Clackamas regional center redevelopment plan
- Lake Grove town center plan
- Beaverton regional center parking management plan
- Washington Square regional center plan
- King City town center plan
- Murrayhill town center plan

Dear Colleague:

You are cordially invited to submit a proposal for a presentation to be part of Rail~Volution '98!

This third annual national conference builds on the success of Rail~Volution '95, held in Portland, Oregon, Rail~Volution '96, held in Washington DC, and Rail~Volution '97, held in St. Louis, Missouri. This year, Rail~Volution returns to Portland, Oregon in conjunction with the Westside Light Rail Grand Opening Celebration.

The theme of the conference is *Building Livable Communities with Transit*. The conference will include plenary sessions, with outstanding national speakers, and smaller sessions to focus on specific topics. There will be three main tracks at the conference:

Track 1 - Beyond Gridlock:

Linking Transit and Land Use

Track 2 - You Can't Go Far Alone:

Building Relationships for the Long Term

Track 3 - The Dollars and Sense of Growing Smart:

The Intersection Between Vision and Profit

Each of the tracks are outlined in more detail on the attached pages. Our goal is to continue Rail~Volution's tradition of a conference that appeals to a variety of perspectives -- elected officials, public employees, transportation specialists, citizen organizers, developers and lenders.

We are looking for the best examples from around the country to help tell the story of building livable communities with transit. To accomplish this ambitious agenda, we need your input. If you have a story to tell, please complete the attached **Program Nomination Solicitation Form** and return it to me by June 1st.

The energy and enthusiasm at Rail~Volution continues to exceed our expectation. Last fall in St. Louis, the conference drew over 35 states and 173 cities

Thank you, and we hope to see you in Portland!

Sincerely,

G.B. Arrington
Rail~Volution Program Chair

Beyond Gridlock: Linking Transit & Land Use

More and more communities are saying yes to smart growth and looking to alternatives the patterns of senseless growth that have America stuck in traffic. This track will give you the means to transcend the barriers by showcasing local success stories and the tool box for integrating transit investments to stimulate economic vitality and community development.

We are looking for papers for workshop sessions on the following topics:

- ☐ The First Step to Livability: Planning for the Pedestrian
- ☐ Leveraging Your Rail Start: Making a Difference with Land Use
- ☐ Rail and Property Values: Through the Roof?
- ☐ Take Me to the Ball Game: Arena's, Urban Reinvestment & Transit
- ☐ Flexible Highway Design – Making the Road fit Your Community
- ☐ Transit Station Area Development: Case Studies
- ☐ Friendly Streets: Trends & Innovations
- ☐ The Public Realm: Designing Transit to Enhance Communities
- ☐ Busting the Big Box: Killing the Category Killers?
- ☐ Balancing Regulations & Incentives: "Transit Friendly Development"
- ☐ Traffic Calming Your Neighborhood, Fire Chief & City Engineer
- ☐ Urban Reinvestment: Recycling our Cities
- ☐ If Density is the Problem: Is Design the Solution?
- ☐ Suburban Transformation: Retrofitting the Wasteland
- ☐ Urban Entertainment Districts and Transit – Friend or Foe?
- ☐ Moving toward a Federal Urban Policy: Making it Easier Locally
- ☐ TOD – What is it, how do you make it successful in your setting?
- ☐ Planning your Rail Start to Make Sense Long Term.
- ☐ Your ideas

You Can't Go Far Alone: Building Relationships For The Long Term

Moving forward without a road map is simply standing still. This track will teach you how to build relationships for the long term and expand your influence through partnerships. It will present examples where partnerships create a critical mass and give voice to define their community's vision, techniques for building bridges with government, religious organizations, foundations and across cultures. With more "toolbox sessions" than ever, this track will help you achieve your vision and move forward.

We are looking for "toolbox sessions" and papers for sessions on the following topics:

- ☐ The Vote is Over: Why Outreach Doesn't Stop
- ☐ Partnering with Religious Organizations
- ☐ Techniques for Relationship Building with state, local and federal agencies
- ☐ Pollsters Roundtable: Spinning Livability
- ☐ Engaging non-traditional Audiences: Lessons in Success
- ☐ Outreach & Coalition Building: Different Models of Public Involvement
- ☐ Tool Box for Change: 10 Steps to Making a Difference
- ☐ The Art of the Deal: Meeting the Requirements of Each Partner
- ☐ Building a Coalition for Livability -- How to succeed
- ☐ The Vision Thing: Tools to Get it in Focus
- ☐ Building Informed Consent
- ☐ Successful Ballot Measures: How do you do it?
- ☐ Seizing the Opportunity when you aren't the Primary player
- ☐ Your ideas here

The Dollars & Sense of Growing Smart : The Intersection between Vision & Profit

This track explores two complementary ideas: the financial and community benefits of growing smart; and the intersection between vision and attracting the large scale private capital to achieve it. Learn from the experts what it takes to move an idea from the drafting board to reality. You will get case studies, practical hands on information on what worked, what didn't and why.

We are looking for papers for workshop sessions on the following topics:

- ☐ Creative Public-Private Partnerships: Responsibilities and Roles
- ☐ Leveraging Smart Growth: Public and Private Capital
- ☐ The Costs of Sprawl: New Community Evaluation Tools
- ☐ Capital Flows: Follow the Money
- ☐ Planes & Trains: Innovative Airport Rail Deals
- ☐ Case Studies: Project Roundtable's
- ☐ Financing the Dream: Transit Oriented Development
- ☐ Community Empowerment: Making the Transit Land Use Connection
- ☐ Taking it to the Bank: Stealing Great Ideas
- ☐ Tomorrow's Good Idea: Emerging Real Estate Markets
- ☐ Innovative Finance: Myths, Magic and the Marketplace
- ☐ Mainstreet: Memory or Trendy?
- ☐ Returning to a Sense of Place: Adding Value with Open Space
- ☐ Developing Infill Housing: Opportunities and Strategies
- ☐ But will it Sell? Marketing TOD's
- ☐ Your Ideas Here
